Subject index

Acetonitrile,
influence of the water activity in ——— on the formation and reduction of an oxide layer on gold (Wagner, Gerischer) 127
n-Type InP, pH probe in ——— + H_2O mixtures. Application to the determination of the acid–base behavior of water in CH_3CN and to measurement of the pK_i of acetonitrile (Etcheberry et al.) 281
Acid–base behavior,
n-type InP, pH probe in $CH_3CN + H_2O$ mixtures. Application to the determination of the ——— of water in CH_3CN and to measurement of the pK_i of acetonitrile (Etcheberry et al.) 281
Adatoms,
heterogeneous electrocatalysis on well defined platinum surfaces modified by controlled amounts of irreversibly adsorbed ———. Part I. Formic acid oxidation on the Pt (111)–Bi system (Clavilier et al.) 89
Heterogeneous electrocatalysis on well defined platinum surfaces modified by controlled amounts of irreversibly adsorbed ———. Part II. Formic acid oxidation on the Pt (100)–Sb system (Fernandez-Vega et al.) 101
Adsorptive stripping voltammetry,
use of silica for ——— in the presence of organic surfactants (Kubiak, Wang) 41
Aldehyde,
surface species produced on Pt electrodes during ——— oxidation in H_2SO_4 solution as studied by IRRAS and DEMS (Nishimura et al.) 219
Alkaline phosphatase,
——— as a label for a heterogeneous immunoelectrochemical sensor. An electrochemical study (Rosen, Rishpon) 27
Alloy,
electrochemical, ellipsometric, and surface science investigation of the PtRu bulk ——— surface (Ticanelli et al.) 61
Anion displacement,
coupled electron hopping–——— in plane sheet fixed-site polymer membranes (Buck) 1
Aromatic hydrocarbons,
electrochemical characteristics of cathodic processes involving ——— and CO_2. Part I. General mechanistic considerations (Ticianelli et al.) 369
Electrochemical characteristics of cathodic processes involving ——— and CO_2. Part II. The ECE/DISP problem (Ticianelli et al.) 379

Bipyridilium,
simple diffuse-reflectance monitoring of emerging surface-attached species. ———, Prussian-Blue and zinc-ferrocyanide voltammetry (Rosseinsky et al.) 233
Bismuth,
heterogeneous electrocatalysis on well defined platinum surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part I. Formic acid oxidation on the Pt (111)–——— system (Clavilier et al.) 89
Bisulfate,
in-situ FT-IR spectroscopic study of ——— and sulfate adsorption on platinum electrodes. Part 1. Sulfuric acid (Kunimatsu et al.) 163

Cadmium telluride,
kinetics of electrocrystallization of tellurium and ——— at the glassy carbon surface (Mori, Rajeshwar) 415
Carbon,
activation of ———–fluorine bonds by oxidative addition at tungsten(0). An electrochemical study (Russell et al.) 139
Carbon monoxide,
adsorption and oxidation of ——— on a rhodium electrode studied by in-situ infrared spectroscopy (Kunimatsu et al.) 115
Electrochemical characteristics of cathodic processes involving aromatic hydrocarbons and ———. Part I. General mechanistic considerations (Ticianelli et al.) 369

Electrochemical characteristics of cathodic processes involving aromatic hydrocarbons and CO_2. Part II. The ECE/DISP problem (Ticianelli et al.) 379
Compact layers,
growth of ——— at the electrode interface. Part II. The formation and stability of uracil films (Wandlowski, Pospíšil) 179
Corrosion,
variation of ——— potential fluctuations of 18-8 stainless steel with sulfur content (Magaino) 227
Cottrell equation,
transient diffusion-limited current to a sinusoidal wall. Extension of the ——— (Nolen, Fedkiw) 265
Cyanides,
efficient visible light photoresponse following surface complexation of titanium dioxide with transition metal ——— (Vrachnou et al.) 193

1,4-Diaminobenzene,
oxidation potential of ———. Calculation versus experiment (Compton et al.) 79
Diffusion equations,
new approach to electrochemical simulations based on eigenvector–eigenvalue solutions of the ———. Part I. Potentiostatic boundary conditions (Friedrichs et al.) 243
(Dimethylpyrrolidinium)(Pb_3),
kinetics of electrogeneration of ——— (Lawin et al.) 357
DISP mechanism,
electrochemical characteristics of cathodic processes involving aromatic hydrocarbons and CO_2. Part II. The ECE/DISP problem (Ticianelli et al.) 379
Double layer,
model of two limiting states for describing the properties of the electric ——— in the absence of specific adsorption of ions (Damaskin et al.) 13

ECE mechanism,
electrochemical characteristics of cathodic processes involving aromatic hydrocarbons and CO_2. Part II. The ECE/DISP problem (Ticianelli et al.) 379
Electrochemical simulations,
new approach to ——— based on eigenvector–eigenvalue solutions of the diffusion equations. Part I. Potentiostatic boundary conditions (Friedrichs et al.) 243
Electron hopping,
coupled ———–anion displacement in plane sheet fixed-site polymer membranes (Buck) 1
Enhanced Raman scattering,
——— from passive films on silver-coated iron electrodes (Rubim, Dünnwald) 327

Fluorine,
activation of carbon–——— bonds by oxidative addition at tungsten(0). An electrochemical study (Russell et al.) 139
Formic acid,
heterogeneous electrocatalysis on well defined platinum surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part I. ——— oxidation on the Pt (111)–Bi system (Clavilier et al.) 89
Heterogeneous electrocatalysis on well defined platinum surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part II. ——— oxidation on the Pt (100)–Sb system (Fernandez-Vega et al.) 101
Furan,
molecular orbital study of the initial processes in the electrochemical polymerizations of pyrrole, thiophene and ——— (Takakubo) 303

p-Gallium arsenide,
oxygen reduction at ——— electrodes in alkaline medium (Jacobs, Rikken) 147
Glassy carbon,
kinetics of electrocrystallization of tellurium and cadmium telluride at the ——— surface (Mori, Rajeshwar) 415
Gold,
influence of the water activity in acetonitrile on the formation and reduction of an oxide layer on ——— (Wagner, Gerischer) 127

Heteropoly oxometalates,
surface modifications with ——— and isopoly oxometalates. Part IV. Further details and kinetic aspects of the h.e.r. on the modified electrodes (Keita et al.) 207
Hydrogen,
surface modifications with heteropoly and isopoly oxometalates. Part IV. Further details

and kinetic aspects of the h.e.r. on the modified electrodes (Keita et al.) 207

Immunoelectrochemical sensor,
alkaline phosphatase as a label for a heterogeneous ———. An electrochemical study (Rosen, Rishpon) 27

Indium phosphide,
n-type ———, pH probe in $CH_3CN + H_2O$ mixtures. Application to the determination of the acid–base behavior of water in CH_3CN and to measurement of the pK_i of acetonitrile (Etcheberry et al.) 281

Ion-selective electrode,
potentiometric determination of metoclopramide using a double-membrane based ——— (Diaz et al.) 295

Iron,
enhanced Raman scattering from passive films on silver-coated ——— electrodes (Rubim, Dünnwald) 327

Isopoly oxometalates,
surface modifications with heteropoly and ———. Part IV. Further details and kinetic aspects of the h.e.r. on the modified electrodes (Keita et al.) 207

Lead,
in-situ grazing incidence X-ray scattering study of the initial stages of electrochemical growth of ——— on silver (111) (Melroy et al.) 403

Limiting states,
model of two ——— for describing the properties of the electric double layer in the absence of specific adsorption of ions (Damaskin et al.) 13

Manganese,
voltammetric studies and stripping voltammetry of ———(II) at the wall–jet ring–disc electrode (Brett, Neto) 345

Membranes,
coupled electron hopping–anion displacement in plane sheet fixed-site polymer ——— (Buck) 1

Mercury,
on the adsorption of oxy-anions on ——— electrodes from solutions of constant ionic strength (Gonzalez) 391

Methanol,
"in situ" infrared reflectance spectroscopic study of the adsorbed species resulting from ——— adsorption on polycrystalline Pt in acid solution (Beden et al.) 463

Metoclopramide,
potentiometric determination of ——— using a double-membrane based ion-selective electrode (Diaz et al.) 295

Molecular orbital,
——— study of the initial processes in the electrochemical polymerizations of pyrrole, thiophene and furan (Takakubo) 303

Multicomponent diffusion,
——— with chemical reactions and its effect in voltammetry (Evans) 451

Nafion,
RF-plasma treatment of ——— film electrodes (Shimazu et al.) 49

Organic surfactants,
use of silica for adsorptive stripping voltammetry in the presence of ——— (Kubiak, Wang) 41

Oxy-anions,
on the adsorption of ——— on mercury electrodes from solutions of constant ionic strength (Gonzalez) 391

Oxygen,
——— reduction at p-GaAs electrodes in alkaline medium (Jacobs, Rikken) 147

Passive films,
enhanced Raman scattering from ——— on silver-coated iron electrodes (Rubim, Dünnwald) 327

Platinum,
electrochemical, ellipsometric, and surface science investigation of the PtRu bulk alloy surface (Ticanelli et al.) 61
Heterogeneous electrocatalysis on well defined ——— surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part I. Formic acid oxidation on the Pt (111)–Bi system (Clavilier et al.) 89
Heterogeneous electrocatalysis on well defined ——— surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part II. Formic acid oxidation on the Pt (100)–Sb system (Fernandez-Vega et al.) 101
In-situ FT-IR spectroscopic study of bisulfate and sulfate adsorption on ———

electrodes. Part 1. Sulfuric acid (Kunimatsu et al.) 163
"In situ" infrared reflectance spectroscopic study of the adsorbed species resulting from CH_3OH adsorption on polycrystalline ——— in acid solution (Beden et al.) 463
Surface species produced on ——— electrodes during HCHO oxidation in H_2SO_4 solution as studied by IRRAS and DEMS (Nishimura et al.) 219
Polyelectrolyte–metal complexes, electrodeposition of ——— (Ohyanagi, Anson) 469
Polymer membranes,
coupled electron hopping–anion displacement in plane sheet fixed-site ——— (Buck) 1
Poly-(*p*-xylyl viologen),
electrode modification by irreversible polyelectrolyte adsorption. Static and dynamic coating of ——— on solid electrodes (Creager, Fox) 431
Prussian Blue,
simple diffuse-reflectance monitoring of emerging surface-attached species. Bipyridilium, ——— and zinc-ferrocyanide voltammetry (Rosseinsky et al.) 233
Pyrrole,
molecular orbital study of the initial processes in the electrochemical polymerizations of ———, thiophene and furan (Takakubo) 303

Quartz crystal microbalance,
observation of kinetic effects during interfacial transfer at redox polymer films using the ——— (Bruckenstein et al.) 457

Raman scattering,
enhanced ——— from passive films on silver-coated iron electrodes. (Rubim, Dünnwald) 327
Raman spectroscopy,
ex situ vs. in situ electrode roughening procedures for surface-enhanced ——— (Beer et al.) 313
Redox polymer,
observation of kinetic effects during interfacial transfer at ——— films using the quartz crystal microbalance (Bruckenstein et al.) 457
Rhodium,
adsorption and oxidation of carbon monoxide on a ——— electrode studied by in-situ infrared spectroscopy (Kunimatsu et al.) 115
Ring–disc electrode,
voltammetric studies and stripping voltammetry of Mn(II) at the wall-jet ——— (Brett, Neto) 345
Roughening procedures,
ex situ vs. in situ electrode ——— for surface-enhanced Raman spectroscopy (Beer et al.) 313
Ruthenium,
electrochemical, ellipsometric, and surface science investigation of the PtRu bulk alloy surface (Ticanelli et al.) 61

Silica,
use of ——— for adsorptive stripping voltammetry in the presence of organic surfactants (Kubiak, Wang) 41
Silver,
enhanced Raman scattering from passive films on ———-coated iron electrodes (Rubim, Dünnwald) 327
In-situ grazing incidence X-ray scattering study of the initial stages of electrochemical growth of lead on ——— (111) (Melroy et al.) 403
Sinusoidal wall,
transient diffusion-limited current to a ———. Extension of the Cottrell equation (Nolen, Fedkiw) 265
Stainless steel,
variation of corrosion potential fluctuations of 18-8 ——— with sulfur content (Magaino) 227
Sulfate,
in-situ FT-IR spectroscopic study of bisulfate and ——— adsorption on platinum electrodes. Part 1. Sulfuric acid (Kunimatsu et al.) 163
Sulfur,
variation of corrosion potential fluctuations of 18-8 stainless steel with ——— content (Magaino) 227
Sulfuric acid,
in-situ FT-IR spectroscopic study of bisulfate and sulfate adsorption on platinum electrodes. Part 1. ——— (Kunimatsu et al.) 163
Surface species produced on Pt electrodes during HCHO oxidation in ——— solution as studied by IRRAS and DEMS (Nishimura et al.) 219

Surface-enhanced Raman spectroscopy,
ex situ vs. in situ electrode roughening procedures for ——— (Beer et al.) 313

Tellurium,
kinetics of electrocrystallization of ——— and cadmium telluride at the glassy carbon surface (Mori, Rajeshwar) 415

Thiophene,
molecular orbital study of the initial processes in the electrochemical polymerizations of pyrrole, ——— and furan (Takakubo) 303

Tin,
heterogeneous electrocatalysis on well defined platinum surfaces modified by controlled amounts of irreversibly adsorbed adatoms. Part II. Formic acid oxidation on the Pt (100)– ——— system (Fernandez-Vega et al.) 101

Titanium dioxide,
efficient visible light photoresponse following surface complexation of ——— with transition metal cyanides (Vrachnou et al.) 193

Transitional metal cyanides,
efficient visible light photoresponse following surface complexation of titanium dioxide with ——— (Vrachnou et al.) 193

Tungsten,
activation of carbon–fluorine bonds by oxidative addition at ———(0). An electrochemical study (Russell et al.) 139

Uracil,
growth of compact layers at the electrode interface. Part II. The formation and stability of ——— films (Wandlowski, Pospíšil) 179

Wall–jet ring–disc electrode,
voltammetric studies and stripping voltammetry of Mn(II) at the ——— (Brett, Neto) 345

Zinc ferrocyanide,
simple diffuse-reflectance monitoring of emerging surface-attached species. Bipyridilium, Prussian-Blue and ——— voltammetry (Rosseinsky et al.) 233
